RELEVANT EXPERIENCE

Xtphere S.r.l. — Full-Stack Developer

JUN 2018 - PRESENT

I currently work in this company as a fullstack developer, here I learned building **webapps** from scratch. I mostly used **JavaEE** with **Spring Boot** framework and **Angular** for frontend.

- Developed features and maintained **insurance motor**, made with **Java Spring Boot**, **JBOSS** & **Angular** for important italian company.
- **Migrated projects** from old Libraries & tools to new one and **improved general performances**.
- Interfaced with important client on a monthly basis providing help and support for new features and improvements.
- Developed tested and maintained **cross platform** web application that works on various devices and browsers.

Edisoft S.r.l. — Front-End Developer

GEN 2017 - APR 2017

First job experience as a developer, I learned more about frontend development. Mostly used **Wordpress**, **JavaScript**, **HTML**, **CSS** & **PHP**.

- Maintained E-Commerce website and added new features, on **Wordpress**.
- Developed and maintained code for client websites primarily using **HTML**, **CSS**, **Javascript**, **Jquery** & **PHP**.

RELEVANT PROJECTS

[LeafPic Gallery](#) — Android App.

Jan 7, 2016 - Present - #opensource

LeafPic is a fluid, material-designed alternative gallery, it also is ad-free and open source under GPLv3 license. I worked as the major designer in this project, I designed and implemented features such as photo affix.

[adbFi](#) — Android App.

Sep 20, 2019 - Present - #opensource

adbFi is an Android app that lets you debug Android apps over Wi-Fi, without the cable connected to your PC!
